Features

3.5 mm jack

Use any headphones with a 3.5mm pin to listen to the music on the phone.

Alternative Bluetooth™ music source

Listen to music on your PC or MP3 player and still be able to receive calls from your phone.

Auto-pairing™

A unique function that makes it possible to pair a Sony Ericsson Bluetooth™ phone with a Sony Ericsson Bluetooth™ accessory without entering a pass code and without compromising security.

Bluetooth™ wireless technology

Technology that enables you to connect Bluetooth™ devices wirelessly, using short-range radio links that operate in a globally available frequency band.

eSCO (extended SCO)

Extended SCO means the signal between your headset and phone can be retransmitted if required to ensure less interference on your call.

Fast automatic volume adjustment

The adjusts in less than a second to the level of background noise to clarify the voice of the person you're talking to.

Full duplex echo cancellation

Full duplex digital echo cancellation means that your conversation is heard clearly at both ends. And what you say is only heard once.

Listen to FM radio

Listen to the FM radio in your wireless Bluetooth™ accessory, while controlling it from your phone

Low battery warning on phone

When the battery runs low on your , a low battery warning will be signalled on your phone.

Multi phone support

Pair two or more phones to your Bluetooth™ accessory so you can use multiple phones at the same time.

Mute

Turn off the microphone during a call.

Never miss a call

When you're listening to music, the handsfree function stays available so the music pauses and you can take the call.

Redial

Redial your last dialled number.

Remote music volume control

Change the volume when listening to music in the from your phone – something you can only do with a Sony Ericsson headset and phone.

Remote voice volume control

Change the volume during voice conversations in the from your phone.

Second call handling

Use the to handle second calls without touching your phone.

Secure Simple Pairing (SSP)

See which track is playing

Track information is shown on the display while playing music.

See who's calling

Caller ID is shown on the Bluetooth™ accessory display when an incoming call is received.

Stereo sound

High-quality dual channel sound for music.

Touch control

Access functionality through touch keys on the frame.

Voice Activated Dialling (VAD)

Use the to initiate voice-activated dialling (VAD) without touching your phone.

Whisper mode

As long as your voice remains within range of the microphone, the ensures your voice remains at an audible level for the person you're talking to, even if the distance between your mouth and the microphone varies.

Wireless music streaming

Listen to high-quality stereo music from your phone in your wireless Bluetooth™ accessory.

Disclaimer

1) When listening to the FM radio on the MW600 and connected to Satio or Vivaz, you will not receive an incoming call alert on the MW600. It will still be possible to take the call on the headset. When switching from music streaming to FM radio with Satio, Vivaz and Vivaz Pro, it is necessary to stop the music first. If not, you will be disconnected from the MW600.

2) Track ID and Caller ID are not fully supported on Xperia X10, X10 mini and X10 mini pro, X8, Vivaz, Vivaz pro and Satio. For the Caller ID function, the number appears on the display but the caller name is not linked from the Phonebook.
